

Master of Information Technology

Benefits

An important part of
our current
professional and
personal life

Highly qualified
specialists in IT,
with R&D
abilities

Manage the most
recent and safe
computing
technologies

Specialization of high
demand at national
and international
level

Curriculum

Data,
Transmission,
Coding and
Compression

Emergent and
Collective
Intelligence
Systems

High-End
Interfaces
and
Equipment

Big Data in
Health and
Bioinformatics

Integrated
Information
Systems

Fault
Diagnosis and
Design for
Testability

Bioinformatics

Optic Fiber
Transmissions

Advanced
Web
Programming

Cellular Data
Networks
